

## *The 5G piece of the Puzzle*

### **Basics: 5G & electrosmog**

Modified versions of electromagnetism with destructive effects  
= pollutions = electrosmog (ES).

Since electromagnetism is the fundament for life and planetary systems, and **ES** is a (dirty) part of electromagnetism, it has the potential to affect *everything*.

**5G**, fifth generation mobile communication =  
increase exposure + new type of rays = increased impact.

## *Impact factors*

- ◆ Modulation (AM/FM, pulse, phased array)
- ◆ Power density (W)  $\rightarrow$  mW/m<sup>2</sup>
- ◆ Frequency (Hz)  $\rightarrow$  2,45 GHz and 60 GHz
- ◆ Exposure (distance, how often, number of sources)
- ◆ Health status
- ◆ Mental state/attitude/mood

## *The new generation: 5*

- ◆ 5G increases health impact and lowers immune system.
- ◆ New **frequencies** = new impact:
  - 10 and 24 GHz impact the water molecule
  - 60 GHz impact the oxygen molecule (in air and body)
  - Diverse impact and coherence (health and environment)

The 60 GHz-band does not require a license/permit, and it is one of the Wi-Fi bands.

→ Using has already started and it will likely increase fast.

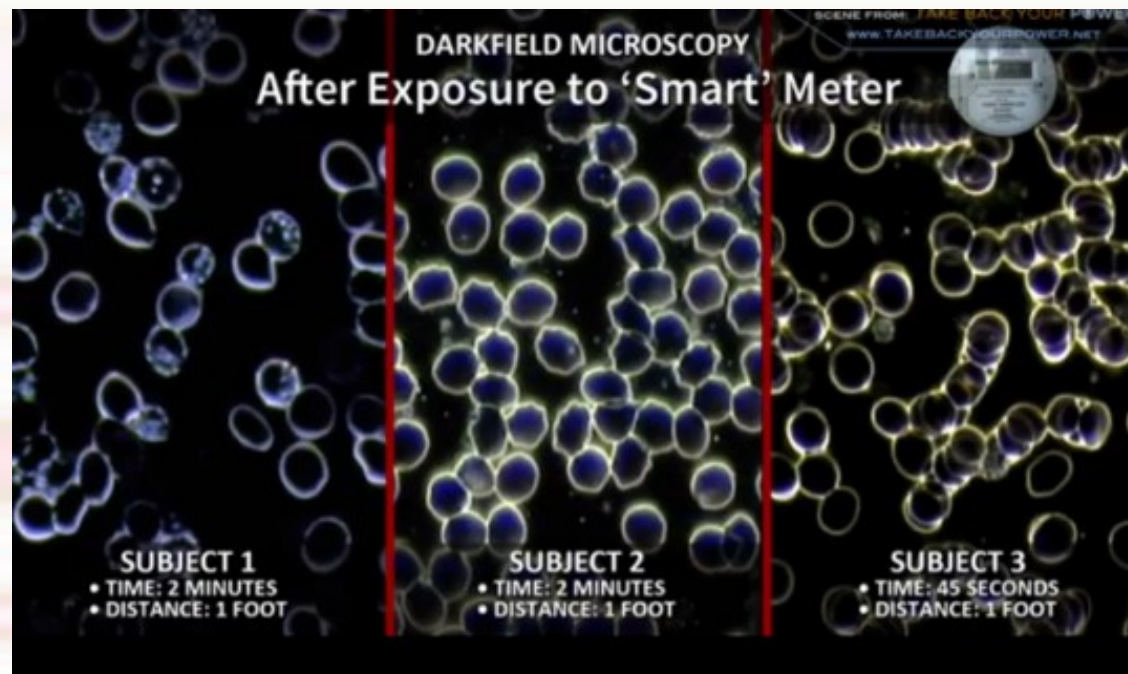

→ Breathing problems have already started - often concentrated to where 5G is (but it doesn't have to be "5G"). *COVID-19 claims were concentrated in the same areas.*

5G usually has higher output **power** as well.

## 5G take my breath away ...

... because it enhances previous impact and add new:

- ◆ 60 GHz impacts the Oxygen molecule (both in air and body) making it less accessible for the body.
- ◆ Triggers histamine which can affect breathing.
- ◆ Affects the Hemoglobin + clumping of blood cells [*pic below*]  
→ less Oxygen distributed to the body.

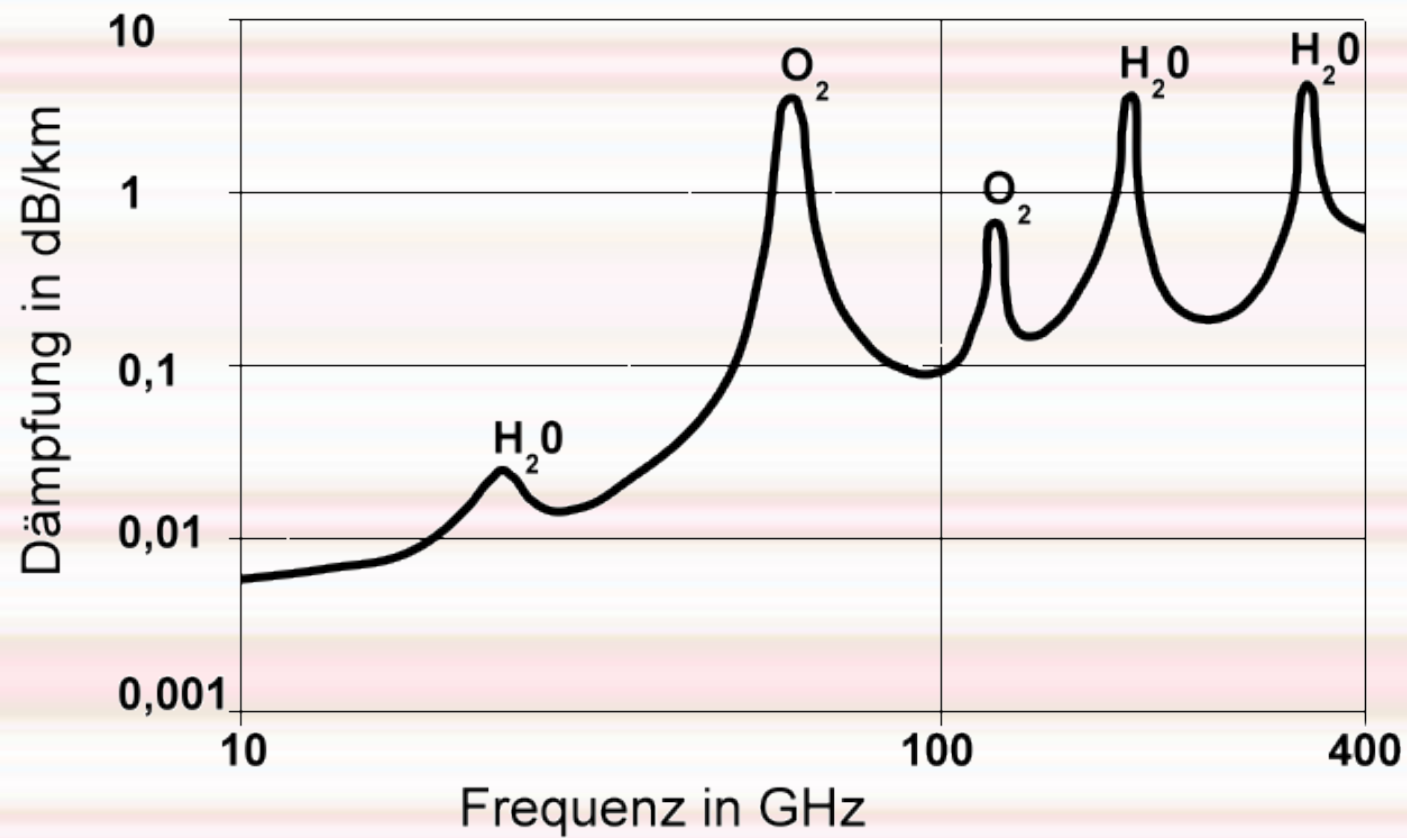

## *Health & environment*

- ◆ Breath
- ◆ Mind
  - The brain needs ~20% oxygen (a lot).
  - Addiction.
  - Direct ES impact.
- ◆ Overall health & immune system → bigger risk of infections and viral disease (symptoms similar to Covid-19).

### **Trees** – the lungs of the world:

- ◆ Direct impact: Poor growth, dehydration, premature death.
- ◆ Indirect: impacting co-workers of the tree + **water** + **air molecules** vital for the photosynthesis (H<sub>2</sub>O, O<sub>2</sub>).
- ◆ Felling of trees related to 5G roll out.

## *Attenuation of air molecules: Water and Oxygen*
